MEMORANDUM

SUBJECT: Eticam EPA ID# NVD 980895338

FROM: Melanie Field ^{Original Signed By:}

TO: File

On September 5, 1986 Tom Fronapfel (NDEP) and I conducted a Facility Assesment on the above facility. Initially we discussed the RFA process. Then we went to the proposed site. Some construction of non-RCRA structures has already begun. Other than the newly constructed facilities, there was nothing but sagebrush and other dry vegetation in the area. The only SWMUs we observed were a pile of scrap lumber from the construction and an empty dumpster.

After visiting the property, we went to the county offices. We examined records at the Tax Assesor's Office, Records Office, Title and Escrow Office and Public Works Department in order to determine previous owners and land use. These sources indicated that before the plans for this development of the property, it was privately owned and left in an unused natural state.

Tom and I developed a draft permit condition to insert in the permit that would cover future releases from future SWMU's. (see Attachment 1)

Attachment I

The Division reserves the right to require the permittee to conduct any investigation or mitigation necessary to protect human health and the environment from past or present releases from solid waste management units. The permittee shall notify the Division, in writing, within 24 hours of discovery of a release of hazardous waste or hazardous constituents (as defined in App. 8) from a solid waste management unit (as defined in ____) or the existence of a previous solid waste management unit.
